

# 🏆 Final Assignment Full-Stack AI Capstone

One timed build that combines **everything** from Sessions 1-9 – your proof that you can ship a complete product, solo, end-to-end.

🕒 2 hours 30 minutes

📅 Tonight · Sat, July 11 · 7:00 PM

🏆 100 points + bonus

🔗 Counts toward your certificate

## 1 What is this? • මොකක්ද මේක?

Instead of tonight's class, you get a **practical capstone project**. When you press **Start**, a full project brief unlocks with a points breakdown for every part. You build it, push to GitHub, and submit – all inside the LMS, with a live timer running.

අද class එක වෙනුවට practical final assignment එකක්. Start කරාම brief එක open වෙනවා — හඳුලා, GitHub එකට push කරලා, LMS එකෙන්ම submit කරන්න. Timer එක live දුවනවා 🕒

HTML

CSS

JavaScript

React

Node.js

Express

MongoDB

🧠 AI Integration

🔧 MCP Server

Everything you've already built in class – tonight you assemble it into one product. **No n8n needed.**

## 2 Tonight's timeline • අද රෑ වෙලාවන්

**SUBMIT – ON TIME** 🟢

7:00 → 9:30 PM

**WARNING** 🟡

→ 10:00

**FINAL CALL** 🔴

→ 11:00 PM

**AUTO-SUBMIT** ⚙️

11:00 PM

7:00 PM – Start button unlocks

9:30 PM

10:00 PM

11:00 PM

🟢 **Before 9:30 PM**

**ON TIME.** Green submit button, **+3 loyalty points**, on-time badge & shout-out. නියම වෙලාවට!

🟡 **9:30 – 10:00 PM**

Accepted with a warning. Submit button turns yellow. +1 point.

🔴 **10:00 – 11:00 PM**

Last chance – button turns red. Wrap up and submit. +1 point.

⚙️ **11:00 PM sharp**

Whatever is saved in your form **auto-submits as-is** and tonight's window closes.

📅 17

**Can't join tonight? – Late window until Sat, July 18 · 9:30 PM.**

Start any day this week – the same 2.5-hour timer applies, submissions earn +1 loyalty point. After Jul 18, 9:30 PM the assignment **disables permanently** for Batch 1. අද බැරි නම් — සතියක් ඇතුළත ඕනම දවසක කරන්න පුළුවන්. ජූලි 18 රෑ 9:30 ට සම්පූර්ණයෙන් close වෙනවා.

### 3 How to find it • Assignment එක හොයාගන්නේ මෙහෙමයි

1

#### Log in to the LMS

Go to [academydsj.com](https://academydsj.com) and sign in with your student account (the email you enrolled with).

2

#### Open your Dashboard

A big **"Final Assignment"** banner is waiting at the top of your student dashboard. You'll also get a  bell notification.

3

#### Read the rules page

Before 7:00 PM you'll see a live countdown + preparation list. Read everything – **the project brief itself stays locked until you press Start.**

4

#### Press Start (after 7:00 PM)

Confirm the warning popup and the timer begins. The full brief, guide tab and submission form appear instantly.

[academydsj.com/final-assignment/live-batch-mern-2026](https://academydsj.com/final-assignment/live-batch-mern-2026)

Direct link – bookmark it now. (Login required · Batch 1 students only)

 Seeing **"page hasn't been written yet"** or an old page? Your browser cached the old site – press **Ctrl + Shift + R** (Windows) / **Cmd + Shift + R** (Mac) to hard-refresh, or open the link in an incognito window. පරණ page එකක් / 404 එකක් දେනවා නම් hard refresh එකක් ගන්න.

### 4 The rules • නීති රීති

#### Brief is hidden until you start

No previewing the project. Everyone sees it only after their own timer starts. Start කරනකම් brief එක දේන්නේ නෑ.

#### One shot – no cancelling

Once started, the timer runs until you submit. Refreshing, closing the tab or switching devices does **not** pause it – it runs on our server clock.

#### 2h 30m target

Cross the target and your timer turns **red** with an alert. You can still submit – but wrap up.

#### Open book

Class notes, docs, your old code and AI assistants are allowed. But **you must understand every line** – you may be asked to walk through it next session.

#### Individual work

Discussing ideas is fine. Identical repos get flagged – build your own thing. තනිගම කරන්න ඕන.

#### Commit as you go

4-5+ meaningful commits while you work. The form **auto-saves your draft**, and at the deadline the draft auto-submits as-is.

 **Don't press Start "just to look."** The moment you start, your attempt is live and the clock never stops. Get your tools ready first, block 2½ quiet hours, *then* start. බලන්න විතරක් Start කරන්න එපා — පටන් ගන්නම ඉවරයි!

## 5 Prepare BEFORE 7:00 PM • කලින්ම ready කරගන්න

### ✓ Your pre-flight checklist

- ☐ **Node.js 18+ & VS Code**  
node -v works in your terminal
- ☐ **AI API key**  
Anthropic Claude or OpenAI – the one from Sessions 7-8
- ☐ **Class notes & session code open**  
Sessions 1-9 – it's open book!
- ☐ **MongoDB ready**  
Atlas connection string from class – or local MongoDB running
- ☐ **GitHub + git configured**  
git config user.name / user.email · signed in on github.com
- ☐ **Quiet 2½ hours + charged laptop**  
Stable internet · water · snacks 🍷

## 6 How to submit • Submit කරන විදිය

### 1 Push everything to GitHub

git add -A → git commit -m "final" → git push. Make the repo **public**, or private with @Dimuthu1234 invited as collaborator.

### 2 Record a 2-3 min demo video (recommended ★)

Screen-record your app working end-to-end. Upload to Google Drive ("Anyone with the link") or YouTube (unlisted). This massively helps your grade review.

### 3 Fill the submission form on the assignment page

**GitHub repo URL (required)** · live URL (only if deployed) · video URL · tick the "what I completed" checklist honestly · add notes for the reviewer.

### 4 Press Submit & confirm

That stops your timer and locks the attempt. You'll see a receipt with your total time, zone (🟢/🟡/🔴) and points earned. Submit කරම timer එක නවතිනවා 🎉

### 5 Grading – during the coming week

Score /100 + written feedback appears on the same page. Best builds get showcased in the final session 🏆

## 🔥 Why submit ON TIME tonight?

Doing it live with the batch at 7:00 PM is the real exam-hall experience – and it pays:

🟢 +3 loyalty points (others +1)

🏆 On-time badge on your submission

📣 Shout-out in the final session

🚀 Portfolio piece done TONIGHT

අදම කරලා ඉවර කරන එක තමයි වටින්තේ – batch එකත් එක්කම, timer එකත් එක්කම. ඔයාට මේක පුළුවන්! 💪

**See you tonight at 7:00 PM sharp** 🕒 • හැමෝටම සුඛ පැතුම! 🚀

**Stuck or have a question?** Ask in the **Batch 1 WhatsApp group** – organisational questions are fine. (Project-specific answers can't be shared while others are still working.) Technical issues with the LMS itself: message the admin immediately.
